8 Frequently Asked Questions

What Is This Tool?

The big picture — what it does and why it matters

The **Healthcare Travel Staffing Term Sheet** is an online calculator that helps staffing companies figure out the financial details of a travel healthcare assignment *before* they commit to it.

Think of It Like This

Imagine you're a staffing company. A hospital in Rochester, NY needs a travel nurse for 13 weeks. You need to answer:

- **What do I pay the nurse?** (hourly rate + housing stipend + meals)
- **What do I charge the hospital?** (the bill rate)
- **What are my costs?** (background checks, drug screens, workers comp, taxes)
- **Am I making money on this deal?** (profit margins)
- **How long until my upfront costs are covered?** (weeks to break even)

This tool answers all of those questions **in real time** as you type. Change one number and everything recalculates instantly.

KEY BENEFIT

You can model different scenarios in seconds. "What if I pay \$22/hr instead of \$20?" — just change the number and immediately see how it affects your margin, markup, and profitability.

Who Is This For?

ROLE	HOW THEY USE IT
Account Managers	Price new assignments and negotiate bill rates with hospitals
Recruiters	Determine competitive pay packages for travel nurses
Operations / Finance	Verify margins and ensure deals are profitable before approval
Business Owners	Get a snapshot of deal health across their portfolio

What Happens to My Data?

- Your data is saved **only in your browser** (on your device). Nothing is sent to a server.
- If you close the browser and come back, your last session is waiting for you.
- Use **Print/PDF** to save a permanent copy.

Getting Started

How to open the tool and what you'll see

Step 1: Open the Tool

Go to this address in any web browser (Chrome, Safari, Edge, Firefox — desktop or mobile):

<https://dengod69.github.io/healthcare-term-sheet/>

Step 2: Choose to Restore or Start Fresh

If you've used the tool before, you'll see a banner at the top:

Previous session found (11 min ago). Restore your data?

Restore Session

Start Fresh

- **Restore Session** — Brings back everything you entered last time
- **Start Fresh** — Clears the form for a brand new deal

Step 3: Understand the Layout

The screen is divided into **three areas**:

Left Sidebar — Shows the candidate's total compensation: hourly, daily, weekly, monthly breakdowns.

Center — The main form where you enter all the deal details.

Right Sidebar — The financial analysis: margins, markup, profit breakdowns, and expense recovery. This is where you determine if the deal makes money.

AUTO-SAVE

Everything you type is automatically saved to your browser. Look for "Auto-save active" in the top-right corner. You don't need to click Save — but you can if you want to.

Section-by-Section Walkthrough

Every field explained in plain English

3A. Assignment & Candidate Details

This is the top section of the form. It captures *who, what, and where* for the assignment.

FIELD	WHAT TO ENTER	EXAMPLE
Assignment ID	Your internal tracking number for this deal	ASG-2026-0142
Status	Where the deal stands in your pipeline	Negotiating
Position Title	The job title and unit/specialty	RN - ICU
Facility Name	The hospital or clinic name	Strong Memorial Hospital
City, State	Location of the facility	Rochester, NY
Facility Zip	5-digit zip code (auto-detects state OT rules)	14601
Candidate Name	The traveler's full name	Sarah Johnson, RN
Email	Candidate's email address	sarah.j@email.com
Phone	Candidate's phone number	(555) 867-5309
License Number	Professional nursing license #	RN-2024-78432
License Expiry	When the license expires	12/31/2026

TIP

Fields marked with an asterisk (*) in the tool are required. But don't worry — the calculations work even if you skip some fields. The financial engine only needs the numbers (rates, hours, weeks).

3B. Assignment Duration & Hours

This section is **critical** — these numbers drive every financial calculation on the page.

FIELD	WHAT TO ENTER	EXAMPLE
Start Date	First day of the assignment	03/01/2026
Contract Weeks	How many weeks the assignment lasts (typically 13 or 26)	13
End Date	Auto-calculates from Start Date + Weeks	05/30/2026
Hours Per Week	Total scheduled hours per week (e.g., 36 for three 12-hr shifts)	36
Shift Hours/Day (OT)	Hours per shift — only appears for states with daily OT rules	12

WHY THIS MATTERS

Total Contract Hours = Hours/Week × Contract Weeks. For our example: 36 hrs × 13 weeks = **468 total hours**. This number is used to convert flat-dollar expenses into a per-hour cost.

OVERTIME RULES BY STATE

The **OT Rules (State)** dropdown controls how overtime is calculated. Different states have different laws:

STATE	DAILY OT KICKS IN	WEEKLY OT KICKS IN	DOUBLE TIME?
Federal (Default)	None	After 40 hrs/week	No
California	After 8 hrs/day	After 40 hrs/week	Yes — after 12 hrs/day
Alaska	After 8 hrs/day	After 40 hrs/week	No
Nevada	After 8 hrs/day	After 40 hrs/week	No
Colorado	After 12 hrs/day	After 40 hrs/week	No
Oregon	After 10 hrs/day	After 40 hrs/week	No
Florida	After 10 hrs/day	After 40 hrs/week	No

HOW IT WORKS

If the nurse is working in California doing 12-hour shifts, 3 days a week (36 hrs total), the tool automatically calculates: **24 regular hours** (8 hrs × 3 days) + **12 OT hours** (4 hrs × 3 days beyond 8-hr threshold). You'll see this breakdown in the OT Rule banner.

3C. Rate Details — Pay Rates & GSA Stipends

This section has **two parts**: what you pay the traveler, and (for travel assignments) what you provide in tax-free stipends.

CHOOSING THE ASSIGNMENT TYPE (TABS)

At the top of this section, you'll see three tabs:

TAB	WHEN TO USE	WHAT IT SHOWS
Local	The nurse lives near the facility — no travel involved	Pay rates only (no stipend panel)
Per Diem	Nurse receives a daily per diem allowance	Pay rates + GSA stipend panel
Travel	Full travel assignment with housing and meal stipends	Pay rates + GSA stipend panel with zip code lookup

CANDIDATE PAY RATES (LEFT TABLE)

Enter the **hourly pay rate** for each type. The tool calculates weekly and total amounts automatically.

EXAMPLE: PAY RATE TABLE

TYPE	\$/HR	\$/WK	TOTAL (13 WKS)	BILL %
Regular (36.0 hrs)	\$20.00	\$720.00	\$9,360.00	26.67%
OT (0.0 hrs)	\$30.00	\$0.00	\$0.00	0.00%
Differential	—	\$0.00	\$0.00	0.00%
Contract Gross Pay		\$720.00	\$9,360.00	26.67%

GSA STIPEND RATES (RIGHT TABLE — TRAVEL & PER DIEM ONLY)

For travel assignments, nurses receive **tax-free stipends** for housing and meals, based on GSA (Government Services Administration) per diem rates for the work location.

- 1 **Enter the facility zip code** in the GSA Rate Lookup box (e.g., 14601 for Rochester, NY)
- 2 **Click "Lookup"** — The system fetches official GSA rates and shows the maximum allowable amounts per day for lodging and meals
- 3 **Enter the stipend amounts** you're providing. You can enter either \$/Hr or \$/Wk — the other calculates automatically. A "max" row shows the GSA limit so you don't exceed it.

EXAMPLE: GSA STIPEND TABLE (ZIP: 14601 — ROCHESTER, NY)

STIPEND	\$/DAY	\$/HR	\$/WK	TOTAL (13 WKS)	BILL %
Lodging	\$107.00	\$20.81	\$749.00	\$9,737.00	27.14%
M&I (Meals)	\$68.00	\$13.22	\$476.00	\$6,188.00	17.63%
GSA Total	\$175.00	\$34.03	\$1,225.00	\$15,925.00	45.37%

WHY GSA MATTERS

GSA stipends are **not taxed**. This means the staffing company doesn't pay Workers' Comp or employer taxes on this money. The tool automatically separates taxable wages from non-taxable stipends when calculating burdens.

3D. Bill Rate Details & VMS Fees

This section captures what you **charge the hospital** — your revenue side of the equation.

ENTERING BILL RATES

Enter the **bill rate per hour** for each rate type. These are what the hospital pays you.

EXAMPLE: BILL RATE TABLE

BILLING TYPE	\$/HR	\$/WK	TOTAL (13 WKS)	BILL %
Bill Rate — Regular (36.0 hrs)	\$75.00	\$2,700.00	\$35,100.00	100%
OT Bill Rate (0.0 hrs)	\$112.50	\$0.00	\$0.00	0.00%
Total Bill	\$75.00	\$2,700.00	\$35,100.00	100%

VMS FEE (VENDOR MANAGEMENT SYSTEM)

Many hospitals use a VMS (like ShiftWise, Medefis, or SAP Fieldglass) that takes a percentage of your bill rate as a fee. This reduces your actual revenue.

- 1 Enter the **VMS Fee %** (e.g., 4.00 for a 4% fee)
- 2 A new "**Net Bill Rate**" row appears showing your bill rate after the VMS cut

$$\text{Net Bill Rate} = \text{Bill Rate} \times (1 - \text{VMS}\%)$$

$$\text{Net Bill Rate} = \$75.00 \times (1 - 0.04) = \$72.00/\text{hr}$$

IMPORTANT

All margin and profit calculations use the **net bill rate** (after VMS), not the gross bill rate. A 4% VMS fee on a \$75/hr bill rate costs you \$3.00/hr — that's \$108/week or \$1,404 over a 13-week contract.

3E. Cost & Expenses

These are **one-time, flat-dollar costs** that you pay upfront to place the traveler. They reduce your profit.

EXAMPLE: EXPENSE TABLE

EXPENSE	FLAT \$	\$/HR BURDEN	TOTAL
Drug Screening	\$85.00	\$0.18	\$85.00
Background Check	\$135.00	\$0.29	\$135.00
Occupational Screening	\$350.00	\$0.75	\$350.00
Total Expenses	\$570.00	\$1.22	\$570.00

$\$570.00 \div 468 \text{ contract hrs (36 hrs/wk} \times 13 \text{ wks)} = \$1.22/\text{hr}$

HOW EXPENSE AMORTIZATION WORKS

You spend \$570 once, but you need to know how it affects your per-hour profit. The tool spreads this cost across all contract hours:

$\text{Expense Burden Per Hour} = \text{Total Expenses} \div \text{Total Contract Hours}$

$\text{Expense Burden Per Hour} = \$570.00 \div (36 \text{ hrs} \times 13 \text{ wks})$

$\text{Expense Burden Per Hour} = \$570.00 \div 468 = \$1.22/\text{hr}$

This **\$1.22/hr** gets added to your cost side in every margin calculation.

ADDING CUSTOM EXPENSE CATEGORIES

- 1 Click the "+ Add Category" button
- 2 Type a name (e.g., "Skills Testing" or "Compliance Training")
- 3 Enter the dollar amount
- 4 Click the **green checkmark** to confirm

3F. Burdens, Taxes & Fees

These are **percentage-based costs** that you pay on every dollar of taxable wages. They're ongoing, not one-time.

FIELD	WHAT IT COVERS	EXAMPLE
WC — Workers Comp (%)	Insurance premium covering workplace injuries. Varies by state and job classification.	5.50%
ER Cost — Employer Cost (%)	Employer's share of payroll taxes: Social Security (6.2%), Medicare (1.45%), FUTA, SUTA, plus any benefits.	18.50%

Total Burden Rate = WC% + ER% = 5.50% + 18.50% = **24.00%**

Burden Per Hour = Taxable Pay Rate × Burden Rate

Burden Per Hour = \$20.00 × 0.24 = **\$4.80/hr**

GSA STIPENDS ARE EXCLUDED

Burdens only apply to **taxable wages** (\$20.00/hr in our example). The \$34.03/hr in GSA stipends is tax-free, so you don't pay WC or ER on it. This is a significant cost savings on travel assignments.

Understanding the Sidebars

Where the magic happens — reading your financial metrics

Left Sidebar: Candidate Compensation

This shows everything the traveler earns, broken down by time period:

Below these tiles, you'll see itemized breakdowns — every pay component listed with its hourly and weekly contribution (Regular, OT, GSA Stipend, etc.).

Right Sidebar: Margin & Markup

This is **your** financial dashboard — the business health of the deal.

HERO SECTION (TOP OF SIDEBAR)

KEY METRICS GRID (6 TILES)

METRIC	WHAT IT MEANS	EXAMPLE	GOOD?
Net Markup	How many times your cost is the net bill rate. Like a multiplier on what you spend. Formula: $\text{Net Bill/Hr} \div \text{Total Cost/Hr}$	1.20x	Yes

Burden % of GM	How much of your gross margin is eaten by burdens (expenses + taxes). <i>Lower is better.</i>	28.69%	OK
Gross Margin \$	Bill - Pay (before any expenses or taxes). The raw spread. <i>Formula: Total Bill - Gross Wages</i>	\$9,815.00	
GM %	Gross margin as a percentage of total bill. <i>Formula: Gross Margin ÷ Total Bill × 100</i>	27.96%	Yes
Net Margin \$	What's left after VMS, burdens, and expenses. This is your actual profit . <i>Formula: Net Bill - Total Cost</i>	\$5,594.60	
Net Margin %	Net margin as a percentage of net bill. The "true" profitability of the deal. <i>Formula: Net Margin ÷ Net Bill × 100</i>	16.59%	Yes

WHAT'S A "GOOD" DEAL?

METRIC	HEALTHY	WATCH OUT	DANGER
Net Markup	1.15x — 1.35x	1.05x — 1.15x	Below 1.0x (losing money)
GM %	25% — 40%	15% — 25%	Below 15%
Net Margin %	15% — 25%	8% — 15%	Below 8%
Burden % of GM	Below 30%	30% — 50%	Above 50%

Profit Breakdowns (Below the Margin Section)

Scroll down on the right sidebar (or see the 3rd column on mobile) for detailed profit analysis.

GM PROFIT BREAKDOWN

Gross Margin profit per time period — Bill minus Pay, before expenses and taxes.

NET PROFIT BREAKDOWN

True profit per time period — after VMS fee, employer taxes, workers comp, and expenses.

WEEKS TO COVER EXPENSES

This answers a crucial question: "How many weeks of profit does it take to pay back the upfront costs?"

COLOR	MEANING	WEEKS
-------	---------	-------

Green	Expenses recovered quickly — healthy deal	2 weeks or less
Orange	Moderate — expenses take a while to recover	2 to 4 weeks
Red	Slow recovery — consider renegotiating the bill rate	More than 4 weeks

OT/DT PROFIT BREAKDOWN

Shows overtime profit in the same Per Hour / Day / Week / Month format as the GM and Net Profit sections — making it easy to see exactly how OT impacts your deal.

OT GROSS MARGIN IN MAIN SIDEBAR

When OT hours exist, two new tiles appear in the main Margin & Markup section — **OT Gross Margin** (weekly dollar amount) and **OT GM %** — so you can see the OT impact right alongside your regular margin metrics. All OT analysis uses the **net bill rate** (after VMS fee).

For states with daily double-time rules (e.g., California), a separate **DT Profit Breakdown** section appears with the same 4-tile format.

New Features: Smart Tools & Safeguards

Automated calculations, break-even analysis, and compliance safeguards

5A. Bill Rate Multiplier (Auto OT/DT Billing)

Instead of manually calculating OT and DT bill rates, the tool can do it for you automatically.

- 1 Enter a **Regular Bill Rate** (e.g., \$75.00/hr)
- 2 An **OT Bill Multiplier** row appears. Enter a multiplier (e.g., 1.5)
- 3 The **OT Bill Rate auto-fills**: $\$75.00 \times 1.5 = \$112.50/\text{hr}$

OT Bill Rate = Regular Bill Rate $\times$ OT Multiplier
DT Bill Rate = Regular Bill Rate $\times$ DT Multiplier (for CA, etc.)

TIP

The multiplier auto-updates whenever the regular bill rate changes. If a VMS fee is entered, the Net OT Bill Rate is calculated on top: $\$112.50 \times (1 - 4\%) = \$108.00/\text{hr}$.

5B. OT/DT Profit Breakdown & OT Gross Margin

The OT/DT section now shows profit in the same **Per Hour / Day / Week / Month** format as the GM and Net Profit Breakdowns, making comparison easy.

When OT hours are entered, two new metric tiles appear in the main **Margin & Markup** sidebar:

OT GROSS MARGIN

\$67.20

4.0 hrs @ \$16.80/hr (net)

OT GM %

21.88%

OT Gross Margin Rate

5C. Break-Even Analysis

Below the OT Profit Breakdown, the **Break-Even Analysis** section shows whether your OT hours are profitable and what rates you'd need to break even.

BREAK-EVEN ANALYSIS EXAMPLE

OVERTIME (OT)

✕ Losing \$1.00/hr

Current OT Margin/Hr	\$-1.00
Max OT Pay (break-even)	\$56.89/hr
Min OT Bill (break-even)	\$81.00/hr
Suggested OT Pay (5% margin)	\$54.04/hr
Suggested OT Bill (5% margin)	\$85.05/hr

METRIC	WHAT IT MEANS
Max OT Pay (break-even)	The highest OT pay rate where you don't lose money. Formula: OT Net Bill ÷ (1 + Burden%)
Min OT Bill (break-even)	The lowest OT bill rate that covers costs. Formula: OT Pay × (1 + Burden%)
Suggested (5% margin)	Rates that would give you a 5% profit cushion beyond break-even

5D. Profitable Term Sheet Calculator

This is the most powerful planning tool in the term sheet. Enter a **Target Net Margin %** and the system **reverse-calculates** what pay rates you should offer to hit that margin target.

- 1 Enter your **bill rate, hours/week, burden rates,** and **VMS fee**
- 2 In the Profit Breakdowns sidebar, find **"Profitable Term Sheet"** and enter a Target NM% (e.g., 15)
- 3 The calculator instantly shows **suggested starting rates** — regular pay, OT pay, stipends, and projected financials

PROFITABLE TERM SHEET — 15% TARGET NM EXAMPLE	
METRIC	SUGGESTED VALUE
Regular Pay Rate	\$38.42/hr
OT Pay Rate (1.5x)	\$57.63/hr
Lodging Stipend/Wk	\$749.00
M&IE Stipend/Wk	\$476.00
Total Weekly Pay	\$2,608.12
Total Weekly Bill (net)	\$3,456.00
Projected NM%	15.00%
Projected NM\$/Wk	\$518.40
Min Wage Floor	\$16.50/hr (NY)

$$\text{Suggested Pay Rate} = \frac{[\text{Net Bill/Wk} \times (1 - \text{Target NM\%}) - \text{GSA Stipends} - \text{Expense Burden}]}{[\text{Weighted Hours} \times (1 + \text{Burden\%})]}$$

HOW TO USE THIS

Use the calculator as a **starting point for negotiations**. Enter the bill rate the client offered, set your target margin, and instantly see what pay rate you can offer the traveler while maintaining profitability.

5E. Minimum Wage Failsafe

The tool includes a built-in **minimum wage protection system** that prevents you from entering a pay rate below the applicable state or city minimum wage.

HOW IT WORKS

1. When you enter a facility zip code, the tool identifies the state and city.
2. If you enter a regular pay rate below the minimum wage, a **warning banner** appears.
3. The pay rate is **automatically corrected** to the applicable minimum wage.
4. The Profitable Term Sheet Calculator also uses this as a floor — it will never suggest a rate below minimum wage.

MINIMUM WAGE COVERAGE

COVERAGE	EXAMPLES
All 50 states + DC	NY: \$16.50, CA: \$16.50, WA: \$16.66, FL: \$13.00, TX: \$7.25
Major city overrides	Seattle: \$20.76, San Francisco: \$18.67, Denver: \$18.29, LA: \$17.28, Chicago: \$16.20

NOTE

Healthcare travel nurses typically earn well above minimum wage (\$20-50+/hr), so this safeguard is primarily a **data entry protection** — catching typos and mistakes before they cascade through all calculations.

Full Example: Walking Through a Real Deal

Let's build a complete term sheet from scratch using sample data

SCENARIO

Strong Memorial Hospital in Rochester, NY needs a **Travel ICU Nurse** for **13 weeks**. They'll work **36 hours/week** (three 12-hour shifts). The hospital pays you a **\$75/hr bill rate** through their VMS (4% fee). You need to figure out: what to pay the nurse, what your costs are, and whether this deal is profitable.

Step 1: Enter Assignment Info

Assignment ID	ASG-2026-0142
Status	Negotiating
Position Title	RN - ICU
Facility	Strong Memorial Hospital
City, State	Rochester, NY
Facility Zip	14601
Candidate	Sarah Johnson, RN

Step 2: Set Duration & Hours

Start Date	03/01/2026
Contract Weeks	13
Hours Per Week	36
OT Rules	Federal (auto-detected from NY zip) — OT after 40 hrs/week

Step 3: Click "Travel" Tab & Look Up GSA Rates

- 1 Click the **Travel** tab
- 2 Enter zip code **14601** and click **Lookup**
- 3 GSA returns: Lodging \$107.00/day, M&I \$68.00/day
- 4 Enter stipends: Lodging **\$749.00/wk**, M&I **\$476.00/wk**

Step 4: Enter Pay & Bill Rates

FIELD	AMOUNT
Regular Pay Rate	\$20.00/hr
OT Pay Rate	\$30.00/hr
Regular Bill Rate	\$75.00/hr
OT Bill Rate	\$112.50/hr
VMS Fee	4.00%

Step 5: Enter Expenses

EXPENSE	AMOUNT
Drug Screening	\$85.00
Background Check	\$135.00
Occupational Screening	\$350.00
Total	\$570.00

Step 6: Enter Burden Rates

Workers Comp (WC)	5.50%
Employer Cost (ER)	18.50%
Total Burden %	24.00%

Step 7: Read Your Results

With all the data entered, here's what the tool calculates:

THE COMPLETE FINANCIAL PICTURE

REVENUE (WHAT THE HOSPITAL PAYS YOU)	
Gross Bill Rate	\$75.00/hr
VMS Fee (4%)	-\$3.00/hr
Net Bill Rate	\$72.00/hr
Net Bill Per Week (36 hrs)	\$2,592.00
Net Bill Total (13 wks)	\$33,696.00
COSTS (WHAT YOU PAY OUT)	
Taxable Pay Rate	\$20.00/hr
GSA Stipends	\$34.03/hr (\$1,225/wk)
Total Candidate Comp	\$54.03/hr (\$1,945/wk)
Burden — WC + ER (24% of \$20.00)	\$4.80/hr
Expense Burden (\$570 ÷ 468 hrs)	\$1.22/hr
Total Cost Per Hour	\$60.05/hr
Total Cost Per Week	\$2,161.65
Total Cost for Contract	\$28,101.40
PROFIT (WHAT YOU KEEP)	
Net Profit Per Hour	\$11.95/hr
Net Profit Per Week	\$430.35/wk
Net Profit Total (13 wks)	\$5,594.60
Net Markup	1.20x
Gross Margin %	27.96%
Net Margin %	16.59%
Weeks to Cover Expenses	1.3 weeks

VISUALIZING THE MONEY FLOW

How Every Number Is Calculated

The formulas behind every metric, in plain English

METRIC	FORMULA	EXAMPLE RESULT
Total Contract Hours	Hours/Week × Contract Weeks	$36 \times 13 = 468$
Blended Pay Rate	(Taxable Pay + GSA Stipend) per hour	$\$20 + \$34.03 = \$54.03$
Net Bill Rate	Bill Rate × (1 - VMS%)	$\$75 \times 0.96 = \72.00
Burden Per Hour	Taxable Pay × (WC% + ER%)	$\$20 \times 24\% = \4.80
Expense Burden/Hr	Total Flat Expenses ÷ Total Contract Hours	$\$570 \div 468 = \1.22
Total Cost Per Hour	Blended Pay + Burden/Hr + Expense/Hr	$\$54.03 + \$4.80 + \$1.22 = \60.05
Net Markup	Net Bill/Hr ÷ Total Cost/Hr	$\$72 \div \$60.05 = 1.20x$
Gross Margin	Total Bill - Gross Wages	$\$35,100 - \$25,285 = \$9,815$
GM %	(Gross Margin ÷ Total Bill) × 100	$(\$9,815 \div \$35,100) = 27.96\%$
Net Margin	Net Bill Total - Total Cost	$\$33,696 - \$28,101.40 = \$5,594.60$
Net Margin %	(Net Margin ÷ Net Bill) × 100	$(\$5,594.60 \div \$33,696) = 16.59\%$
Burden % of GM	(Total Burden/Hr ÷ Gross Margin/Hr) × 100	$(\$6.02 \div \$20.97) = 28.69\%$
Weeks to Cover Expenses	Total Flat Expenses ÷ Net Profit/Week	$\$570 \div \$430.35 = 1.3 \text{ wks}$
OT Bill (Multiplier)	Regular Bill Rate × OT Multiplier	$\$75 \times 1.5 = \112.50
OT Net Bill Rate	OT Bill Rate × (1 - VMS%)	$\$112.50 \times 0.96 = \108.00

OT Margin/Hr	OT Net Bill - OT Pay - OT Burden	$\$108 - \$90 - \$21.60 = -\3.60
Break-Even Max Pay	OT Net Bill $\div$ (1 + Burden%)	$\$108 \div 1.24 = \87.10
Suggested Pay (Target NM%)	$[\text{NetBill/Wk} \times (1 - \text{NM}\%) - \text{Stipends} - \text{ExpBurden}] \div [\text{Weighted Hrs} \times (1 + \text{Burden}\%)]$	Varies by inputs

Frequently Asked Questions

Answers to common questions

Q: DO I NEED TO FILL IN EVERY FIELD?

No. The financial engine needs these minimum fields to work: **Hours/Week**, **Contract Weeks**, **Pay Rate**, and **Bill Rate**. Everything else adds accuracy but isn't required.

Q: WHAT'S THE DIFFERENCE BETWEEN GROSS MARGIN AND NET MARGIN?

Gross Margin = Bill - Pay. It's the simple spread before any costs.

Net Margin = Net Bill - Total Cost (pay + taxes + WC + expenses). It's your *actual* profit.

Q: WHY DOES MY NET MARKUP SHOW 0.00X?

This usually means you haven't entered a bill rate yet, or the bill rate is \$0. Enter a bill rate and it will calculate instantly.

Q: WHAT HAPPENS IF I DON'T ENTER CONTRACT WEEKS?

The tool switches to a "weekly snapshot" mode. Expenses are estimated per-week instead of amortized over the full contract. For the most accurate expense burden, always enter weeks.

Q: CAN I USE THIS ON MY PHONE?

Yes! The layout automatically adapts for mobile. The form is full-width at top, with three columns below showing Candidate Compensation, Margins, and Profit Breakdowns side by side.

Q: IS MY DATA SECURE?

Your data stays in **your browser only** (localStorage). It's never sent to any server. If you clear your browser data, it's gone. Use Print/PDF to keep a permanent copy.

Q: HOW DO I COMPARE TWO SCENARIOS (E.G., DIFFERENT PAY RATES)?

Open the tool in two browser tabs. Set up the same base deal in both, then change the variable you want to compare (e.g., \$20/hr vs \$22/hr). View them side-by-side.

Q: WHY ARE GSA STIPENDS SEPARATE FROM PAY?

GSA stipends (housing and meals) are **tax-free** for the traveler and **burden-free** for the company. You don't pay Workers Comp or employer taxes on stipends, which saves significant money. The tool keeps them separate to calculate burdens correctly.

Q: WHAT DOES "BURDEN % OF GM" TELL ME?

It tells you what percentage of your gross margin goes to overhead costs (expenses + employer taxes + workers comp). If it's over 50%, more than half your spread is going to costs — not profit.

Q: HOW DO I SAVE A PDF?

Click the **"Print/PDF"** button at the bottom of the form. In the print dialog, select "Save as PDF" as the destination. The sidebars are hidden in print mode so you get a clean document.

Q: HOW DOES THE BILL RATE MULTIPLIER WORK?

When you enter a regular bill rate, an **OT Multiplier** row appears. Enter a number (e.g., 1.5) and the OT bill rate auto-fills as Regular × Multiplier. It updates in real-time whenever the regular bill rate changes. The multiplier also works for DT rates in states like California.

Q: WHAT DOES "BREAK-EVEN" MEAN IN THE OT ANALYSIS?

Break-even is the point where your OT revenue exactly covers your OT costs (pay + burden). The "Max OT Pay" tells you the highest pay rate where you don't lose money. If your current OT pay is above that number, every OT hour costs you money.

Q: HOW DOES THE PROFITABLE TERM SHEET CALCULATOR WORK?

Enter a **Target Net Margin %** and the tool reverse-calculates the maximum regular pay rate that achieves that margin, factoring in your bill rate, burden, VMS fee, stipends, and expenses. It also respects minimum wage laws — it will never suggest a rate below the applicable state or city minimum.

Q: WILL THE TOOL STOP ME FROM ENTERING BELOW MINIMUM WAGE?

Yes. If you enter a regular pay rate below the applicable minimum wage (based on the facility zip code), the tool shows a warning and auto-corrects the rate to the minimum. This works with all 50 states plus major city overrides like Seattle, San Francisco, and Denver.

Glossary of Terms

Industry terms defined in plain language

TERM	DEFINITION
Bill Rate	The hourly rate you charge the hospital. This is your revenue.
Pay Rate	The hourly rate you pay the traveler. This is your largest cost.
Blended Rate	The combined hourly value of pay + stipends. What the traveler "earns" per hour in total value.
Burden	Costs you pay on top of wages — employer taxes, workers comp, insurance, and amortized expenses.
Burden Rate	The dollar amount per hour that burden costs you (e.g., \$4.80/hr).
GSA Per Diem	Government-set maximum daily rates for housing and meals in a specific city. Used as the basis for tax-free travel stipends.
Gross Margin	Bill minus Pay — the raw spread before any costs are deducted.
Net Margin	What's left after ALL costs (VMS, pay, taxes, WC, expenses). Your true profit.
Markup	A multiplier showing how much more you bill than your costs. 1.20x = you bill 20% more than your costs.
VMS	Vendor Management System — a technology platform hospitals use to manage staffing vendors. They charge a % fee.
WC (Workers Comp)	Insurance covering workplace injuries. You pay a premium as a % of taxable wages.
ER Cost	Employer-side payroll taxes — Social Security (6.2%), Medicare (1.45%), federal and state unemployment taxes, and any benefits.
Amortize	To spread a one-time cost across multiple hours. Example: \$570 in expenses spread over 468 hours = \$1.22/hr.
OT (Overtime)	Hours worked beyond the threshold (usually 40/week or 8/day depending on state). Paid at 1.5x the regular rate.
DT (Double Time)	Hours worked beyond an extended threshold (e.g., 12 hrs/day in California). Paid at 2x the regular rate.
M&I	Meals & Incidental Expenses — part of the GSA per diem rate covering food and small expenses.
Stipend	A fixed allowance paid to the traveler for housing or meals. Tax-free when based on GSA rates.
Contract Hours	Total hours in the assignment = Hours/Week × Weeks. Used to amortize flat expenses.
Bill Rate Multiplier	A factor applied to the regular bill rate to auto-calculate OT/DT bill rates (e.g., 1.5x for OT, 2.0x for DT).
Break-Even Rate	The pay or bill rate at which profit is exactly \$0 — no gain, no loss. Used to evaluate OT profitability.

Target NM%	Your desired Net Margin percentage. Used by the Profitable Term Sheet Calculator to reverse-engineer suggested pay rates.
Minimum Wage	The legally mandated lowest hourly pay rate, set by federal, state, or city law. The tool enforces the highest applicable rate.
OT Gross Margin	The raw spread on overtime hours: (Net OT Bill - OT Pay) × OT Hours per week.
